DIMENSIONS

Horsepower
6 hp

Six horsepower (4.4 kW) with dual motors for hydrodynamics, maneuverability, and a top speed of 13 mph.

Weight
50 lb

At only 50 lb, Elite is easy to move around and can be launched with just one hand.

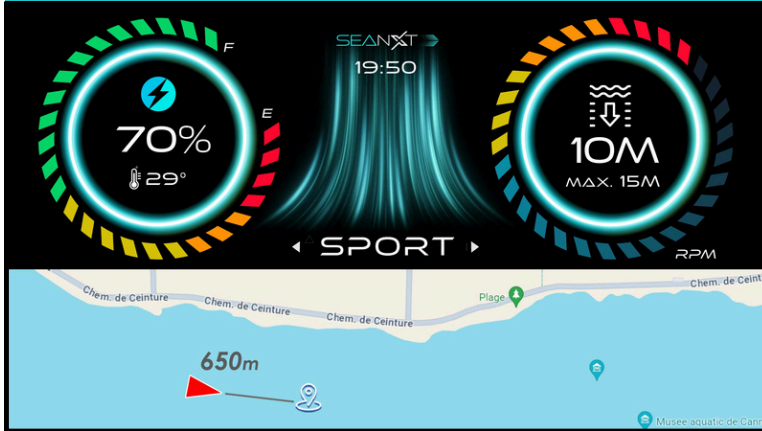

Enjoy 4 speed modes with a minimum run time of 40 minutes.

Max depth setting can be adjusted in increments on the display screen.

GPS Navigation

See your position on the map as well as the starting position where the unit was turned on.

Buoyancy

The buoyancy and weight distribution of Elite has been optimized for the underwater experience. You can now glide underwater and explore with ease.
